

# M-FILES FOR OIL & GAS DEMO VAULT DESCRIPTION

VERSION 1.1 | LAST UPDATED 24 NOVEMBER 2020

## 1. Description

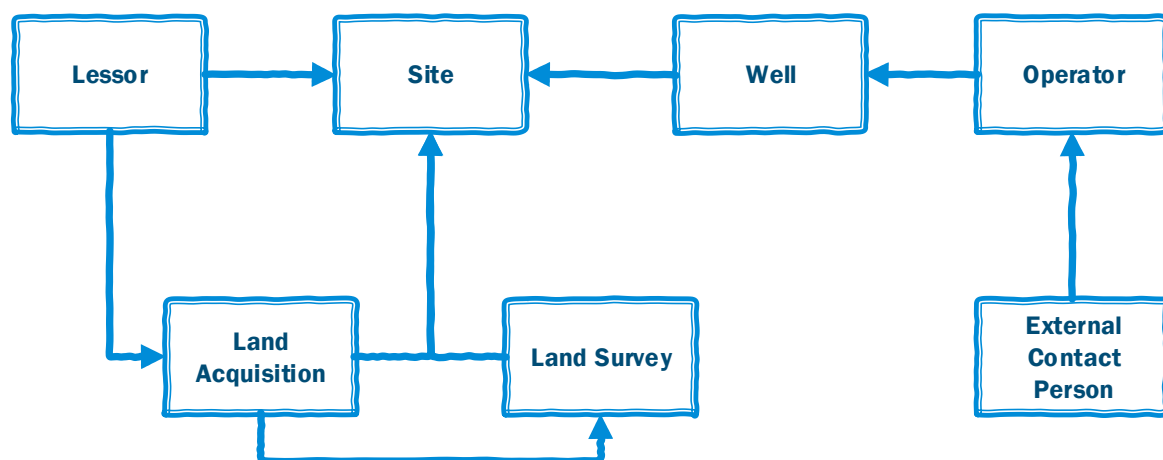

The Oil & Gas demo vault covers document management use cases that are relevant to the Oil & Gas industry.

The demo company is called **Oil & Gas Development Ltd.**

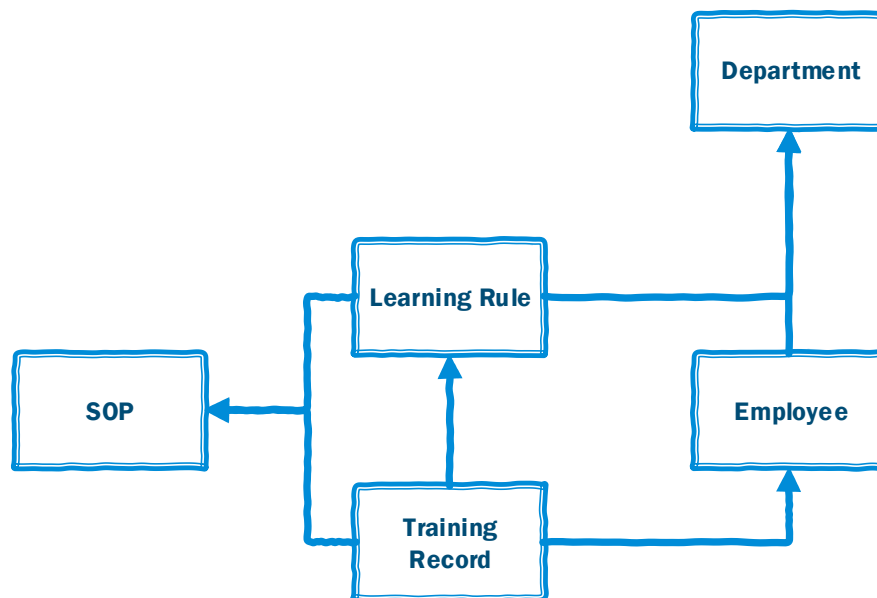

Main features include:

- Managing documents and contracts related to assets (site, well), projects and lessors
- Managing safety SOPs and Training Records
- Audit Management

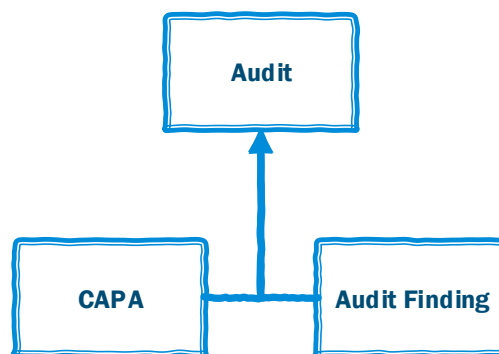

The land management related data is structured according to the picture below. A *Site* represents any land that is either being surveyed, owned, or leased. A *Well* is always on a *Site* and it may have an *Operator*. Each of the objects may contain documents, such as Leases, Permits, Surveys, Agreements or Contracts etc.

The SOP and Training functionality consists of documents that are to be learned (in this case, documents in Class Procedures). Learning Rules are referring to the document's working copy version and system automatically refers to the latest published (PDF) version. Training Records are created by the system based on the department information in the Learning Rule.

The Audit features include *Audit*, *Corrective and Preventive Actions* and *Audit Finding* objects. Implementation in this demo is less controlled than in QMS and it is meant more to support audit process than control it.

- The Demo Vault does not currently include ESRI integration. The ESRI demo is available in cloud server *Sales Demo US*.
- The Demo includes add-ons which require additional licenses and configuration that might require consultancy work to set up properly in customer's environment.

## 1.1 Using Outlook Integration

If you want to show how emails can be moved to M-Files from Outlook, you can use the information below to get started quickly.

- Create folder: "Allmon correspondence"
- M-Files Properties
  - Land Survey: Land Survey - Allmon (fixed)
  - Class: Email (fixed)
  - Sender: From (read from email)
  - Name or title: Subject (read from email)

## 2. Changes

24.11.2020:

- M-Files Information Extractor updated to version 20.8.9339.1
- M-Files SharePoint Online connector updated to version 20.2.17
- M-Files Network Folder connector updated to version 20.8.9339.3
- Application licenses updated (expiration date 31.12.2021)

Need M-Files 20.11.9630.6 or newer.

## 3. Links for more detailed info

Demo instruction video and demo vault are available in Motive.

Playbook material in Product Info vault (same materials are available in Partner Portal)
